# PERSONALIZED SIGNAGE :

## Civic address

Kalitec civic address bollards enhance the safety of your municipality by allowing emergency vehicles to quickly locate entrances away from the road.

# BENEFITS

## Anticorrosive

The posts are protected from corrosion. The performance model provides increased durability.

## Constant visibility

The reflectivity of the digits provides visibility day or night.

## Customizable

The integration of the colors and logo of your municipality makes it possible to determine the limits of your territory.

## ► PERFORMANCE MODEL

Our civic address bollard is a flagship product thanks to its conception, design, durability and high-end materials, making it the best on the market.

<b>Panel</b>	Panel painted in polyester powder composed of two aluminum plates welded by points and fixed to the post with rivets designed by a goldsmith.
<b>Print</b>	Laser cut 3M prismatic high intensity grade vinyl numbers.
<b>Post</b>	1500 mm (5 ft) square post made of aluminum and painted in polyester powder.
<b>Installation</b>	Easy planting with separate anchoring ensuring a constant height of the bollards.
<b>Other options</b>	Possibility of enlarging the surface of the panel if necessary.

## ► UTILITY MODEL

Our entry-level civic address bollard makes it possible to meet strict address identification needs.

<b>Panel</b>	Two-sided aluminum panel bolted to the post.
<b>Print</b>	Engineer grade vinyl available in four color choices: blue, burgundy, green or white.
<b>Post</b>	2100 mm (7 ft) galvanized steel post.
<b>Installation</b>	Easy planting with post driven directly into the ground.
<b>Other options</b>	Possibility of doubling the signs to indicate an additional address, a direction arrow or a group of addresses by gap.
