

BOLLARDS

Kalitec bollards prevent vehicle access in specific areas such as bike paths, pedestrian areas and more. They are both resistant and highly visible, thus increasing safety.

BENEFITS

Robust

Manufactured from hot-dip galvanized steel or 6005-T5 extruded aluminum.

Easy setup

Installed on planted anchors requiring no concrete blocks, thus avoiding costs.

➤ REMOVABLE BOLLARD

- Secures access to the trail while allowing certain vehicles to pass.
- Installs quickly and locks with a simple padlock.
- Made in Quebec.

➤ RIGID BOLLARD

- Available in diameters ranging from 50 to 200mm.
- Easy to install in all situations with the possibility of using Kalifix™ technology.

➤ CUSTOM BOLLARDS

- Customizable to better match their environment.
- Made of the best materials to meet all your needs.
