SMART SIGNAGE :

Dynamik™

Dynamik™ is an intelligent control platform allowing the remote management of dynamic signage infrastructures.

BENEFITS

Real-time control
Enables and disables panels in no time.

Statistics and notifications
Offers detailed telemetry of connected objects, including alarms in the event of a detected failure.

Low consumption
Supports the deployment of solar-powered infrastructure.

HOW IT WORKS

Control
Remote and in real time or based on a defined schedule

Notifications
By email in the event of a system fault (e.g. low battery)

Statistics
On system performance:
- Use of infrastructure
- Charging solar panels
- Battery voltage
- Temperature
- Ambient light

Examples of uses:

Kali-Park™ no-parking lights
Control the display of no-parking hours remotely.

Kali-Flash illuminated pedestrian crossings
Receive statistics on the number of activations and notifications in the event of a breakdown.

Kali-Flow™ reserved lane lights
Control the display of reserved lanes remotely.

Several hundred connected infrastructures!
