

SMART SIGNAGE :

Kali-Flow™

Kali-Flow™ is an emergency signage for priority lanes that optimizes responsiveness in emergency situations and facilitates the work of first responders.

BENEFITS

Easy setup

Designed to be quickly and easily installed on all types of supports such as lampposts, poles, etc.

Optimal visibility

Equipped with light beams that are visible from afar and a sensor allowing a progressive adjustment according to the ambient lighting.

Guaranteed durability

Made with a waterproof casing and ultra-robust aluminum resistant to impacts or bad weather to operate year-round in any climate.

USE KALI-FLOW™ WITH OUR DYNAMIK™ TECHNOLOGY!

Management of Kali-Flow™ panels is more efficient thanks to the Dynamik™ platform allowing instant control via a cloud connection.

- Remote and real-time activation
- Operation statistics
- Alarms in the event of a defect

More than a hundred panels installed in Canada!

Kali-Flow™ panels were chosen for priority lane projects on Boul. Corbusier in Laval (STL) and for the SRB Pie-IX in Montreal (STM).

CUSTOMIZABLE TO YOUR NEEDS

Versatile display and functions

Different custom elements, colors, shapes, and sizes are available for each application.

Solar or electric powered

Solar energy with an autonomous system that does not require expensive infrastructure or connection to an electrical network.

DIFFERENT ACTIVATION MODES POSSIBLE

- **Remote and real-time activation**
Instantaneous control via the Dynamik™ platform
- **Programming by calendar**
Planning a schedule for activation at predetermined times
