

SMART SIGNAGE :

Kali-Park LED Parking sign

The Kali-Park smart parking sign indicates temporary curbside parking restrictions to facilitate snow removal or street maintenance operations on public roads.

BENEFITS

Clear information

Provides clear information so that citizens know when they need to find alternative parking and to limit misunderstandings.

Easy installation

Equipped with a robust CE and TUV certified solar collector that can be quickly and permanently installed on all poles without an electrical connection.

Optimal visibility

Narrow-beam flashing LED lights are easy to spot from a distance and meet light signal standards.

Guaranteed durability

Covered by a 2-year warranty and requires minimal maintenance besides from changing the battery after 5 years.

HOW IT WORKS

Remotely programmable

Manage the display from the Dynamik™ cloud platform.

Automates tasks

Update the system automatically via an LTE-M cellular connection.

Sends alerts

Receive alerts by email or SMS to warn you in the event of a breakdown.

Generates reports

Get real-time status and accurate reports to plan preventative maintenance.

Integrates with existing systems

Integrate Kali-Park with your existing management systems such as *Info-déneigement*.

CASE STUDY : Pilot project - City of Laval

Installation of 21 Kali-Park parking lights customized to the needs of the city.

«The installation of the lights is perfectly stable and their activation was instantaneous. The city is all in all very pleased to have installed Kali-Park parking lights for this project.»

PROVEN EFFECTIVENESS

- Reduced cost of installing temporary parking signs
- Reduction in the number of vehicle tows
- Acceleration of snow removal or maintenance operations on public roads
