

PERSONALIZED SIGNAGE : Interpretation panels

Kalitec interpretation panels are ideal for your projects for parks, tourist circuits, identification of historic sites or heritage houses.

BENEFITS

Robust and anti-graffiti

Anti-theft assembly and protection against vandalism, scratches, peeling and fading from UV rays by our Print Armor™ technology with a 10-year limited warranty.

Economical, ecological and sustainable

Recyclable metal structure painted in polyester powder giving it a lifespan of over 20 years.

Easy setup

Quick and easy installation in the ground or concrete with a fixing at the back for a finish without visible fasteners.

Aesthetic and customizable design

Different design elements, supports, colors and sizes are available to choose from to blend in well with the environment.

TWO CATEGORIES OF PANELS TO MEET YOUR NEEDS.

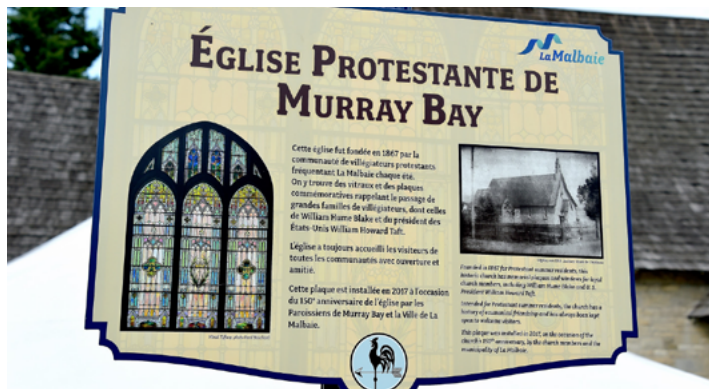

The 3D panel

Made with a 15 mm folded edge and reinforcement bars welded to the back ensuring an unparalleled appearance.

Decorative cutout

Constructed from premium aluminum alloy and manufactured to the shape of your choice.

Post options

Premium quality posts are made of aluminum or hot-dip galvanized steel. Driven piles avoid the cost of a concrete base and reduce their environmental impact.

Adjustable support

The adjustable support and the modular panel are very resistant and allow an optimization of the angle as well as a rotation of the positions according to the seasons.
