

Data Sheet

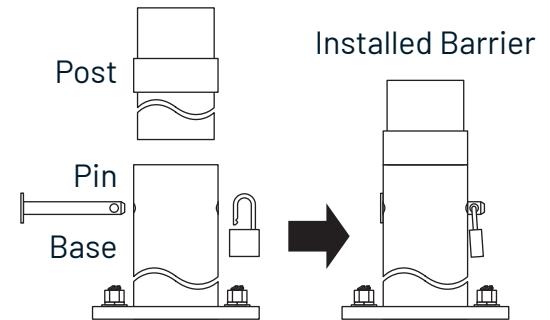

> Specifications

Barriers are 1-arm galvanized steel structures that offer longer range than their aluminum counterpart. Depending on particular placement at installation, they can be used to block the way or slow down traffic (chicane).

- Welded galvanized steel tubes with polyester powder-coating paint and H.I. grade reflective sheeting strips
- Removable Locking System with Pin and Padlock, which fastens Post to Base, to facilitate emergency operations
- Standard dimensions (1-arm barrier):
Overall 2265 x 1250 mm (89.2 x 49.2 in)
Central post dia. 114 x wall 4.8 mm (dia. 4.5 x wall 3/16 in)
Variable arm length, standard 2200 mm (86.6 in)
- Installed on concrete base (by third-party)
