Rectangular Rapid Flashing Beacon (RRFB) for Crosswalks Kali-Flash[™]

Kali-Flash is a pedestrian-activated flashing light system designed to enhance safety at pedestrian crossings.

Discover the benefits of our system:

- **Optimal visibility**: Powerful, oversized flashing lights capture the attention of drivers, reducing the risk of accidents.
- **Dynamik**[™] **Connectivity**: Our real-time monitoring solution allows for tracking the status and performance of Kali-Flash, ensuring optimal operation.
- **Easy installation**: Quickly adapts to all types of locations without requiring complex work.
- **Simplified maintenance**: A robust design that minimizes maintenance needs for greater peace of mind.

Standard features

Beacons	Module compliant with MUTCD 11th edition standards (Chapter 4L) and ONTARIO: OTM Book 15		
	Black powder coated vandal-resistant aluminum cabinet		
0	Two amber LED lamps measuring 76 mm x 178 mm (3"x7"), UV-resistant		
	Amber LED side indicator light (25 mm x 75 mm) to inform pedestrians of the operation of the frontal lights		
	Automatic adjustment of intensity based on ambient light, MUTCD 11th edition		
	R0HS certified LEDs		
Control Box			
	Corrosion-resistant aluminum enclosure providing excellent protection for the battery control module, fea operated quarter-turn lock.	turing a lockabl	e door with
	Easy access for maintenance, diagnostics, and adjustment of crossing times		
•	Nema 4X electronic enclosure		
	IC and FFC certified		
nergy management		Regular	Prem
Solar Panel			
-	Manageretalling galar papalos for batter obstraing oven an coldest dave	\checkmark	1
	Monocrystalline solar panels: for better charging even on coldest days	~	\checkmark
	360° adjustment of solar panels for optimized installation	√ √	\checkmark
	360° adjustment of solar panels for optimized installation	\checkmark	
	360° adjustment of solar panels for optimized installation Autonomy without recharging: 7 days with 400 activations/day - Flash duration at 20 sec	\checkmark	√ √
Battery	360° adjustment of solar panels for optimized installation Autonomy without recharging: 7 days with 400 activations/day - Flash duration at 20 sec TUV, CE and IEC certified	√ √ √	√ √
Battery	360° adjustment of solar panels for optimized installation Autonomy without recharging: 7 days with 400 activations/day - Flash duration at 20 sec TUV, CE and IEC certified Sealed, replaceable, maintenance-free recyclable AGM-type batteries, provide the widest temperature range, longest lifespan, and high performance in cold weather:		√ √

	Passive pedestrian detection	×	0
	Pedsafety Guardian [®] Button Passive pedestri	an detection	
 The MOAB Piezo push button offers improved responsiveness, exceptional durability, and a modern design, outperforming mechanical buttons for an optimal user experience (ADA compliant). Audible signal on activation (complies with MUTCD 11th edition). Certified resistant NEMA TS 2 and waterproof NEMA 250 - 6P. 	equipped with a speaker that informs people with reduced mobility of the flashing lights (ADA compliant).	 The lights turn on automatically when a bedestrian is detected, but only if they show the intention to cross. Activation will not occur if: A pedestrian approaches without intending to cross. A pedestrian who has already crossed arrives from the other side.
